Receipt Reports

Dynix 181 made changes to the Electronic Carbon Receipt Report and has added two new receipt reports.

Electronic Carbon Receipt Report Changes (RCR)

The Electronic Carbon Receipt Report now includes the library name in the header of the report. The report also displays the patron ID. Here is an example of the new report:

The screenshot shows a terminal-style report with the following data:

RECEIPT#	DATE/TIME	PATRONID...	USER...	STN	DESCRIPTION.....	AMOUNT...
1	17 FEB 00 9 01:16pm			SUPPORT	21 Collected - lost	\$20.00

						\$20.00
2	17 FEB 00 23 01:16pm			SUPPORT	21 Collected - damaged	\$2.75

						\$2.75
3	17 FEB 00 23 01:17pm			SUPPORT	21 Collected - damaged	\$5.00

						\$5.00
Total						\$27.75

3 records listed.

New Receipt Reports

Dynix 181 includes these new reports:

- Receipts by Block Type.
- Receipts by Port.

Receipts by Block Type (RCRB)

The new Receipts by Block Type report lists receipts, organized by patron block type. Here is an example of the Receipt Block Report:

```
Receipt Block Report for Bush Memorial Library
From: 01 JAN 00 to 31 JAN 00

Block Description          Block Totals
Collected - overdues      11.00
Collected - lost          48.00
Collected - fees          2.00
-----
TOTAL                      $61.00
```

Receipts by Port (RCRP)

The new Receipts by Port report lists receipts, organized by the port (location) where they were printed. This type of report will be useful in isolating transactions to a specific location. (For example, you could use this report to reconcile a cash drawer.)

Here is an example of a Receipts by Port report:

```
